

Trimble sponsors Geospatial World Forum 2017

India: Geospatial Media and Communications is glad to introduce Trimble Navigation Limited as the Strategic Sponsor for [Geospatial World Forum 2017](#), which is scheduled to take place from January 23th- 25th, 2017, in the city of Hyderabad, India.

As a Strategic Sponsor, Trimble will showcase the offerings for geospatial, surveying and mapping professionals and for major industries such as agriculture, utilities, urban development and smart cities.

Trimble is sponsoring the symposium on [smart cities](#) focusing on urban habitat, construction, utilities and mobility. In this session, the technology team from Trimble will discuss and showcase how various aspects of smart city planning and development can benefit from geospatial technologies. Some of these are GNSS, LiDAR, BIM and 3D mapping.

In another symposium on [agriculture](#), also sponsored by Trimble, the focus will be on the role of geospatial information in above-mentioned sector. The session will discuss ICT for agriculture, weather information and precision agriculture. Trimble's Agriculture team will showcase their latest precision farming offerings and explain how Trimble's agriculture solutions enhance the efficiency of farming.

About Geospatial World Forum 2017

[Geospatial World Forum](#) is a mega geospatial business and professional event, taking place since the past decade. Organized by Geospatial Media and Communications, the event is known for highlighting the value and power of geospatial technology as an enabler in addressing global economic and socio-economic issues. It is one of the 'must-attend' events for geospatial professionals, featuring large-scale conference and exhibition, top-ranked keynote speakers, major industry segments, high-level discussion programs and various social networking events.

About Geospatial Media and Communications

Geospatial Media and Communications is an internationally accredited organization, having committed itself to serve stakeholders of geospatial community and work towards opening new era of industrialization, while facilitating collaboration and demonstrating value and benefits of geospatial technology and information for governance, businesses and people.
