

FARO confirms presence at European Geospatial Business Summit as silver sponsor

Amsterdam: Geospatial Media and Communications is pleased to introduce [FARO](#), the world leader in 3D measurement and imaging solutions, as a silver sponsor at [European Geospatial Business Summit](#). The event is scheduled to take place on 17 September 2018 as a pre-conference to INSPIRE conference in Antwerp.

European Geospatial Business Summit is a unique and first-of-its-kind platform to demonstrate the evolution of geospatial industry, business models, and value proposition of European geospatial professionals and companies. The summit's 2018 edition is organized in partnership with the European Commission's INSPIRE, DG Environment, Informatie Vlaanderen, Geonovum, and EARSC.

"We've evolved and reshaped ourselves over the past few years to focus on providing complete solutions to construction industry professionals along the building life cycle," stated Andreas Gerster, Vice President – Global Construction BIM. "With our Traceable Construction solutions, we create a consistently structured set of verified data, which will be a big boost for construction accuracy. This will result in less time and money wasted at the construction site achieving not only a better construction quality but also a higher Return on Investment."

"We're excited to have the support from FARO at this event. With the rise of high-precision 3D capture business in geospatial industry, insights from a world leader like FARO will add tremendous value to the summit as we strive to make it a truly thought leadership event," said Anamika Das, Vice President, Outreach and Business Development at Geospatial Media and Communications.

About European Geospatial Business Summit

European Geospatial Business Summit is a unique and first-of-its-kind platform to demonstrate the evolving geospatial business models and offers European geospatial professionals and companies the opportunity to converse, network, collaborate, and optimize their business dimensions. Discussions at the summit will be based on insightful report "European Geospatial Business Outlook Report" that will highlight trends, business models of the future, and opportunities for European Geospatial business community. More details about the event is available at www.geobuiz.eu
